

ATMG SOUNDS

SOUND THAT MOVES YOU

DON'T PAY TWICE

THE ESSENTIAL GUIDE BEFORE
YOU UPGRADE YOUR SOUND.

DON'T PAY TWICE.

Seven questions before you upgrade your sound.

01 What do I want to change?

Describe what is missing: bass, vocal clarity, comfortable volume, or a complete upgrade. Bring a few favorite songs to your consultation.

02 What does my vehicle already have?

Share the year, make, model, trim, factory audio package, and previous upgrades. Factory amplifiers and signal processing can affect the integration plan.

03 What is my complete installed budget?

Ask for an itemized quote covering equipment, wiring, integration parts, labor, fabrication, and tuning. Compare the complete installed scope.

04 Will the equipment work together?

Ask the installer to confirm fitment, amplifier power, impedance, enclosure needs, and signal compatibility for your vehicle.

DON'T PAY TWICE.

Seven questions before you upgrade your sound.

05 What space and daily use will I give up?

Discuss cargo room, seating, storage, access, and appearance. For boats or motorcycles, ask about equipment and mounting suitable for the environment.

06 What is included after installation?

Ask about setup, tuning, warranty, workmanship support, and adjustments. Get the agreed scope and exclusions in writing.

07 What happens before I commit?

Review the plan with CJ Sounds. Confirm equipment availability, final installed price, schedule, and payment options. Recommendations are not final quotes.

Your ride. Your sound. Your budget.

Audio guidance by David Rosa. Installation by CJ Sounds.
